

ELECTRIC ROYALTIES COMMENCES TRADING ON THE OTCQB® VENTURE MARKET IN THE UNITED STATES

September 20, 2021, Vancouver, BC – Electric Royalties Ltd. (TSX.V: ELEC) (OTCQB: ELECF) (“Electric Royalties” or the “Company”) is pleased to announce that it has qualified for trading on the OTCQB® Venture Market (the “OTCQB”) in the United States operated by the OTC Markets Group Inc. and the Company’s common shares commenced trading today on the OTCQB under the symbol "ELECF". The Company’s common shares will continue to trade on the TSX Venture Exchange under the symbol "ELEC.V".

Electric Royalties CEO, Brendan Yurik, stated, "Trading on the OTCQB is an important step towards strengthening our U.S. shareholder base and broadening our global investor reach. The OTCQB eligibility will allow us to expand our audience and activate our shareholder base in the U.S market as we continue to grow our portfolio of battery minerals royalties. I look forward to introducing the Company's exciting story to investors located in the USA and am pleased that we have now made it easier for US investors to participate in our growth story".

The OTCQB® offers investors transparent trading in entrepreneurial and development stage U.S. and international companies that may not yet qualify for OTCQX. To be eligible, companies must be current in their reporting and undergo an annual verification and management certification process. The OTCQB quality standards provide a strong baseline of transparency, as well as the technology and regulation to improve the information and trading experience for investors. Investors can find real-time level 2 quotes and market information at www.otcm Markets.com/stock/ELECF/overview.

An application for the Depository Trust & Clearing Corporation (DTCC) eligibility is currently pending and once complete, will further facilitate electronic clearing and settlement of the Company’s common shares in the United States.

On Behalf of the Board of Directors,
Brendan Yurik
CEO

About Electric Royalties Ltd.

Electric Royalties is a royalty company established to take advantage of the demand for a wide range of commodities (lithium, vanadium, manganese, tin, graphite, cobalt, nickel, zinc & copper) that will benefit from the drive toward electrification of a variety of consumer products: cars, rechargeable batteries, large scale energy storage, renewable energy generation and other applications.

Electric vehicle sales, battery production capacity and renewable energy generation are slated to increase significantly over the next several years and with it, the demand for these targeted commodities. This creates a unique opportunity to invest in and acquire royalties over the mines and projects that will supply the materials needed to feed the electric revolution.

Electric Royalties has a growing portfolio of 17 royalties, including one royalty that currently generates revenue. The Company is focused predominantly on acquiring royalties on advanced stage and operating projects to build a diversified portfolio located in jurisdictions with low geopolitical risk offering investors exposure to the clean energy transition via the underlying commodities required to rebuild the global infrastructure over the next several decades towards a decarbonized global economy.

Cautionary Statements Regarding Forward-Looking Information and Other Company Information

This news release includes forward-looking information and forward-looking statements (collectively, "forward-looking information") with respect to the Company within the meaning of Canadian securities laws. Forward looking information is typically identified by words such as: believe, expect, anticipate, intend, estimate, postulate and similar expressions, or are those, which, by their nature, refer to future events. This information represents predictions and actual events or results may differ materially. Forward-looking information may relate to the Company's future outlook and anticipated events and may include statements regarding the financial results, future financial position, expected growth of cash flows, business strategy, budgets, projected costs, projected capital expenditures, taxes, plans, objectives, industry trends and growth opportunities of the Company and the projects in which it holds royalty interests.

While management considers these assumptions to be reasonable, based on information available, they may prove to be incorrect. Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company or these projects to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. These risks, uncertainties and other factors include, but are not limited to risks associated with general economic conditions; adverse industry events; marketing costs; loss of markets; future legislative and regulatory developments involving the renewable energy industry; inability to access sufficient capital from internal and external sources, and/or inability to access sufficient capital on favourable terms; the mining industry generally, the Covid-19 pandemic, recent market volatility, income tax and regulatory matters; the ability of the Company or the owners of these projects to implement their business strategies including expansion plans; competition; currency and interest rate fluctuations, and the other risks.

The reader is referred to the Company's most recent filings on SEDAR for a more complete discussion of all applicable risk factors and their potential effects, copies of which may be accessed through the Company's profile page at www.sedar.com.
